Technical Data Sheet

Adifiller O

Adifiller O is an organic filler used to fill loose areas and tighten the leather grain.

Description :

Adifiller O is a semi paste, fluid at room temperatures becoming a paste at lower temperatures. Freezing is not detrimental to the product, neither are high temperatures, - though prolonged heating at a boiling temperature could cause darkening.

Typical Analysis :

pH : 6.6
% Solids: 48%

Properties :

Adifiller O maybe used on all types of leather and gives excellent filling in the flanks and loose areas, and an improved tightening of the grain. It also gives a degree of fiber lubrication, which helps buffing.

The product readily dissolves in warm water and can be used at any normal retanning and dyeing pH at various stages of the process.

When added before the dye it helps development of the shade and enhances the brightness of the dyeing. This can result in less dye being necessary to obtain a given shade.

Application :

Adifiller O can be applied in a separate float, or in with the anionic fatliquor float. Normally 2-5% is used and run for 10 minutes at 110-140° F before continuing with the dyeing process.

Package :

Adifiller O is packaged in 550 lbs net steel drums.
