Technical Data Sheet

Adioil BSN

Adioil BSN is a bisulfited high quality natural based oil.

Description

Adioil BSN is a high quality natural oil which has been fully deodorized so virtually no odor is carried over to the finished leather.

The oil's high bisulfite content gives better softening properties to a wide range of leathers. It is golden yellow in color and is an oil of medium viscosity. It will carry large amounts of raw oils to enhance a rich surface feel.

Typical Analysis

Charge	Anionic
Moisture Content	35% +/- 2%
pH (10% Solution)	6.0 +/- 1.0

Application

Adioil BSN because of its excellent lightfastness and heat-aging stability is recommended for use on upper leather, upholstery, and garment leather, - especially where high tensile strength properties are required. The oil is non yellowing so may be used on white and pale colored leathers. Where a rich surface feel is required Adioil BSN will carry up to 25% by weight of raw oils.

Normally between 5-12% is used depending on the application.

Directions for Dissolving

Adioil BSN may be readily dissolved in both hot and cold water, but if raw oils are to be utilized they should be mixed with the Adioil BSN before the addition of water.
